Subject Index of Volume 152

Acetate complexes
  Ca complexes of mixed ligands; $Ca_2(acetate)_4(HOH)_2$ and $Ca_{1.5}(salicylate)_2(acetate)(HOH)_2$-(acetic acid), 9
Aluminium complexes
  role of delocalized α,α'-carbanion in vitamin B_6 and Al(III) catalyzed transamination of α-amino and α-keto acids, 181
Amine complexes
  crystal structures of four models for binding to DNA of cisplatinum derivatives containing bidentate tertiary diamine, 125
  importance of intermediate charge-transfer complex formation in model reaction for laccase, 41
  studies on reactions of $PtCl_2en$, *cis*-$Pt(NH_3)_2Cl_2$ and their aqua species with adenosine, deoxyadenosine and adenine using ion-pair HPLC, 91
Amino acid complexes
  aminoacidate dechelation upon hydroxo complex formation in mixed ligand metal chelates, 209
  effectiveness of carboxyl as primary ligating group in aryl–SO_2 N-protected amino acids–Cu(II) systems; solution and structural investigation on Cu(II)–*N*-tosyl-L-leucinate system, 17
  EPR study on interaction of hexavalent Cr with glutathione or cysteine; production of pentavalent Cr and its stability, 251
  properties of bivalent metal complexes with racemic 4-thiazolidinecarboxylic acid, 211
  role of delocalized α,α'-carbanion in vitamin B_6 and Al(III) catalyzed transamination of α-amino and α-keto acids, 181
  synthesis and structure of complex tetra-μ-prolinatodirhodium(II), 107
Antibiotics
  concerning coordination site of antibiotic nalidixate ion towards Cu^{2+} ions using ^{13}C NMR, 77
Anti-inflammatory activity
  exchange reactions between disulphides and Myocrisin; an *in vitro* model for mechanism in chrysotherapy, 261
  photolytic release of Cu from Cu penicillamine complex $[Cu(II)_6Cu(I)_8(D\text{-penicillamine})_{12}Cl]^{5-}$, 219
Anti-inflammatory drug complexes
  meclofenamic acid complexes of Mn(II), Fe(III), Co(II), Ni(II), Cu(II) and Zn(II), 171
Anti-inflammatory drugs
  Cu anti-inflammatory drugs in rheumatoid arthritis; computer aided drug design, 215
Antitumor activity
  antitumor and toxicologic properties of organometallic anticancer agent vanadocene dichloride, 117
  electronic structure of Pt(II) antitumor complexes and their interactions with nucleic acid bases, 151
  monomeric, air-stable metallocenes of main-group elements as antitumor agents, 75
  of some organometallic Bi(III) thiolates, 49
  of organotin compounds; reaction synthesis and structure of $Et_2SnCl_2(phen)$ with 5-fluorouracil, 67
  synthesis, characterization and antitumor activity or some metal complexes of 3- and 5-substituted salicylaldehyde *o*-hydroxybenzoylhydrazones, 25
Antitumoral ligand complexes
  synthesis and structure of tetra-5,6-dihydropyrimidino[5,4-*c*]carbazole dichloride hexachloroplatinate(IV) tetrahydrate, 189
Aroylhydrazone complexes
  synthesis, characterization and antitumor activity of some metal complexes of 3- and 5-substituted salicylaldehyde *o*-hydroxybenzoylhydrazones, 25
Arsenicum compounds
  ^{13}C NMR spectral analysis of mono- and diphenylarsine adducts of glutathione in DMSO, 1
Ascorbate complexes
  studies of reactions of Fe(II) ascorbate mixtures with molecular O in solution, 227

Bacterial complexes
  high-spin Fe(II) complexes of *ortho*-functionalized paraquinones as models for quinone binding sites in reaction centres of photosynthetic bacteria, 37
Bidentate ligand complexes
  crystal structures of four models for binding to DNA of cisplatinum derivatives containing bidentate tertiary diamine, 125
  high-spin Fe(II) complexes of *ortho*-functionalized paraquinones as models for quinone binding sites in reaction centres of photosynthetic bacteria, 37
Binuclear complexes
  importance of intermediate charge-transfer complex formation in model reaction for laccase, 41
Bismuth complexes
  antitumor activity of some organometallic Bi(III) thiolates, 49

© Elsevier Sequoia/Printed in Switzerland

Cadmium complexes
metal binding in metallothioneins; competition for Cd and Zn between Chelex-100 and metal binding sites in metallothionein, 111
Calcium complexes
^{43}Ca NMR of Ca^{2+}–calmodulin solutions; effects of trifluoroperazine and peptides, 257
formation microequilibria of proton, Ca and Mg complexes of γ-carboxyglutamate ion and related compounds, 233
of mixed ligands; $Ca_2(acetate)_4(HOH)_2$ and $Ca_{1.5}(salicylate)_2(acetate)(HOH)_2$(acetic acid), 9
Carbonyl complexes
dicarbonylrhodium(I) complexes of 8-azaadenine bases with N1 or N3 as metal binding sites, 223
Carboxylate complexes
molecular structure and magnetic properties of dimeric *N,N'*-ethylenebis(salicylamine)Fe(III)-μ-methoxo-*N,N'*-ethylene(*o*-hydroxylphenylglycine)salicylamine Fe(III); complex with μ-monodentate acetato bridge, 135
Catalysis
role of delocalized α,α'-carbanion in vitamin B_6 and Al(III) catalyzed transamination of α-amino and α-keto acids, 181
Catalytic activity
importance of intermediate charge-transfer complex formation in model reaction for laccase, 41
Chelate complexes
Cu anti-inflammatory drugs in rheumatoid arthritis; computer aided drug design, 215
crystal structures of four models for binding to DNA of cisplatinum derivatives containing bidentate tertiary diamine, 125
high-spin Fe(II) complexes of *ortho*-functionalized paraquinones as models for quinone binding sites in reaction centres of photosynthetic bacteria, 37
Chelate ligand complexes
role of rate determining steps in decorporation of toxic metal ions, 159
synthetic methods and *in vitro* Fe binding studies of novel 1-alkyl-2-ethyl-3-hydroxypyrid-4-one Fe chelators, 195
Chromium complexes
EPR study on interaction of hexavalent Cr with glutathione or cysteine; production of pentavalent Cr and its stability, 251
Cobalt complexes
importance of intermediate charge-transfer complex formation in model reaction for laccase, 41
visible and magnetic circular dichroism studies on Co(II)-substituted *Rhus vernicifera* laccase, 139
Copper complexes
aminoacid dechelation upon hydroxo complex formation in mixed ligand metal chelates, 209
binding of metal ions by enalapril maleate and lisinopril, 81
chelation of Cu(II) by daunomycin and 5-iminodaunomycin and interaction of complexes with mononucleotides; ESR study, 145
Cu anti-inflammatory drugs in rheumatoid arthritis; computer aided drug design, 215
effectiveness of carboxyl as primary ligating group in aryl–SO_2 N-protected amino acids–Cu(II) systems; solution and structural investigation on Cu(II)–*N*-tosyl-L-leucinate system, 17
importance of intermediate charge-transfer complex formation in model reaction for laccase, 41
photolytic release of Cu from Cu penicillamine complex $[Cu(II)_6Cu(I)_8(D\text{-penicillamine})_{12}\text{-}Cl]^{5-}$, 219
structural change in one-electron oxidation–reduction at Cu site in nitrite reductase; evidence from EXAFS, 53
surface area studies of Zn sulphide and its reaction with Cu complexes and Cu containing proteins, 265
X-ray absorption study on type II Cu-depleted cucumber ascorbate oxidase, 3
Copper ions
concerning coordination site of antibiotic nalidixate ion towards Cu^{2+} ions using ^{13}C NMR, 77
Crystal structure(s)
of $Ca_2(acetate)_4(HOH)_2$ and $Ca_{1.5}(salicylate)_2$-$(acetate)(HOH)_2$(acetic acid), 9
of Cu(II)–*N*-tosyl-L-leucinate system, 17
dicarbonylrhodium(I) complexes of 8-azaadenine bases, 223
of dimeric *N,N'*-ethylenebis(salicylamine)Fe(III)-μ-methoxo-*N,N'*-ethylene(*o*-hydroxylphenylglycine)salicylamine Fe(III), 135
of four models for binding to DNA of cisplatinum derivatives containing bidentate tertiary diamine, 125
of tetra-5,6-dihydropyrimidino[5,4-*c*]carbazole dichloride hexachloroplatinate(IV) tetrahydrate, 189
Cytochrome complexes
model complex for active site of cytochrome P-450, 5
pH dependence of stereochemistry around heme group in NO–cytochrome *c* (horse heart), 241
Cyclopentadienyl complexes
antitumor and toxicological properties of organometallic anticancer agent vanadocene dichloride, 117
monomeric, air-stable metallocenes of main-group elements as antitumor agents, 75

Dinuclear complexes
molecular structure and magnetic properties of dimeric *N,N'*-ethylenebis(salicylamine)Fe(III)-μ-methoxo-*N,N'*-ethylene(*o*-hydroxylphenylglycine)salicylamine Fe(III); complex with μ-monodentate acetato bridge, 135
reactions of [PtCl(dien)]Cl with glutathione, oxidized glutathione and *S*-methyl glutathione; formation of S-bridged dinuclear unit, 201
synthesis and structure of complex tetra-μ-prolinatodirhodium(II), 107
Dioxygen complexes
importance of intermediate charge-transfer complex formation in model reaction for laccase, 41
Disulphide complexes
exchange reactions between disulphides and Myocrisin; an *in vitro* model for mechanism in chrysotherapy, 261

Electrochemistry
molecular structure and magnetic properties of dimeric *N,N'*-ethylenebis(salicylamine)Fe(III)-μ-methoxo-*N,N'*-ethylene(*o*-hydroxylphenylglycine)salicylamine Fe(III); complex with μ-monodentate acetato bridge, 135
radiochemical and electrochemical studies of interaction of Zn^{2+} (^{65}Zn) with radiosensitizer misonidazole, 43
Electronic structure
of Pt(II) antitumor complexes and their interactions with nucleic acid bases, 151
Enalapril maleate
binding of metal ions by enalapril maleate and lisinopril, 81
Enzyme complexes
model complex for active site of cytochrome P-450, 5
X-ray absorption study on type II Cu-depleted cucumber ascorbate oxidase, 3

Germanium complexes
monomeric, air-stable metallocenes of main-group elements as antitumor agents, 75
Gold complexes
exchange reactions between disulphides and Myocrisin; an *in vitro* model for mechanism in chrysotherapy, 261

Hemoprotein complexes
pH dependence of stereochemistry around heme group in NO–cytochrome *c* (horse heart), 241
Heterocyclic ligand complexes
synthesis and structure of tetra-5,6-dihydropyrimidino[5,4-*c*]carbazole dichloride hexachloroplatinate(IV) tetrahydrate, 189
Hydrazone complexes
synthesis, characterization and antitumor activity of some metal complexes of 3- and 5-substituted salicylaldehyde *o*-hydroxybenzoylhydrazones, 25
Hydroxo complexes
aminoacidate dechelation upon hydroxo complex formation in mixed ligand metal chelates, 209

Iron complexes
high-spin Fe(II) complexes of *ortho*-functionalized paraquinones as models for quinone binding sites in reaction centres of photosynthetic bacteria, 37
intermediate spin protoporphyrin(IX) Fe(III) complexes, 61
model complex for active site of cytochrome P-450, 5
molecular structure and magnetic properties of dimeric *N,N'*-ethylenebis(salicylamine)Fe(III)-μ-methoxo-*N,N'*-ethylene(*o*-hydroxylphenylglycine)salicylamine Fe(III); complex with μ-monodentate acetato bridge, 135
pH dependence of stereochemistry around heme group in NO–cytochrome *c* (horse heart), 241
studies of reactions of Fe(II) ascorbate mixtures with molecular O in solution, 227
synthetic methods and *in vitro* Fe binding studies of novel 1-alkyl-2-ethyl-3-hydroxypyrid-4-one Fe chelators, 195

Keto acid complexes
role of delocalized α,α'-carbanion in vitamin B_6 and Al(III) catalyzed transamination of α-amino and α-keto acids, 181
Kinetics and mechanism
formation microequilibria of proton, Ca and Mg complexes of γ-carboxyglutamate ion and related compounds, 233
role of rate determining steps in decorporation of toxic metal ions, 159
studies on reactions of $PtCl_2$en, *cis*-$Pt(NH_3)_2Cl_2$ and their aqua species with adenosine, deoxyadenosine and adenine using ion-pair HPLC, 91

Lisinopril
binding of metal ions by enalapril maleate and lisinopril, 81

Magnesium complexes
formation microequilibria of proton, Ca and Mg complexes of γ-carboxyglutamate ion and related compounds, 233
Magnetochemistry
molecular structure and magnetic properties of dimeric *N,N'*-ethylenebis(salicylamine)Fe(III)-μ-methoxo-*N,N'*-ethylene(*o*-hydroxylphenyl-

glycine)salicylamine Fe(III); complex with μ-monodentate acetato bridge, 135
Manganese complexes
on chemical mechanism of O_2-evolution in photosystem II, 73
Metal complexes
meclofenamic acid complexes of Mn(II), Fe(III), Co(II), Ni(II), Cu(II) and Zn(II), 171
photochemical reduction of NADP to NADPH and hydrogenation of 2-butanone using 2,2′-bipyridinium salts as electron carriers, 55
properties of bivalent metal complexes with racemic 4-thiazolidinecarboxylic acid, 211
synthesis, characterization and antitumor activity of some metal complexes of 3- and 5-substituted salicylaldehyde *o*-hydroxybenzoylhydrazones, 25
Metalloprotein complexes
visible and magnetic circular dichroism studies on Co(II)-substituted *Rhus vernicifera* laccase, 139
Metallothionein complexes
metal binding in metallothioneins; competition for Cd and Zn between Chelex-100 and metal binding sites in metallothionein, 111

Nalidixic acid
concerning coordination site of antibiotic nalidixate ion towards Cu^{2+} ions using ^{13}C NMR, 77
Nitric oxide complexes
pH dependence of stereochemistry around heme group in NO–cytochrome *c* (horse heart), 241
Nitrite reductase
structural change in one-electron oxidation–reduction at Cu site in nitrite reductase; evidence from EXAFS, 53
Nitrocompound complexes
radiochemical and electrochemical studies of interaction of Zn^{2+} (^{65}Zn) with radiosensitizer misonidazole, 43
NMR studies
concerning coordination site of antibiotic nalidixate ion towards Cu^{2+} ions using ^{13}C NMR, 77
Nucleic acid base complexes
electronic structure of Pt(II) antitumor complexes and their interacitons with nucleic acid bases, 151
Nucleobase complexes
studies on reactions of $PtCl_2$en, *cis*-$Pt(NH_3)_2Cl_2$ and their aqua species with adenosine, deoxyadenosine and adenine using ion-pair HPLC, 91
Nucleoside complexes
dicarbonylrhodium(I) complexes of 8-azaadenine bases with N1 or N3 as metal binding sites, 223
monotheophylline and monotheophyllinato complexes of Pd(II) and their interactions with nucleosides, 101
Nucleotide complexes
chelation of Cu(II) by daunomycin and 5-iminodaunomycin and interaction of complexes with mononucleotides; ESR study, 145

Organotin complexes
antitumor activity of organotin compounds; reaction, synthesis and structure of Et_2SnCl_2-(phen) with 5-fluorouracil, 67
Oxo compounds
ESR spectra of vanadyl ion detected in branchial basket of ascidian, *Ascidia ahodori*, 177
Oxygen complexes
on chemical mechanism of O_2-evolution in photosystem II, 73
studies of reactions of Fe(II) ascorbate mixtures with molecular O in solution, 227

Palladium complexes
monotheophylline and monotheophyllinato complexes of Pd(II) and their interactions with nucleosides, 101
Penicillamine complexes
photolytic release of Cu from Cu penicillamine complex $[Cu(II)_6Cu(I)_8(D\text{-penicillamine})_{12}\text{-}Cl]^{5-}$, 219
Peptide complexes
EPR study on interaction of hexavalent Cr with glutathione or cysteine; production of pentavalent Cr and its stability, 251
formation microequilibria of proton, Ca and Mg complexes of γ-carboxyglutamate ion and related compounds, 233
reactions of [PtCl(dien)]Cl with glutathione, oxidized glutathione and *S*-methyl glutathione; formation of S-bridged dinuclear unit, 201
Peptide compounds
^{13}C NMR spectral analysis of mono and diphenylarsine adducts of glutathione in DMSO, 1
Photoactivity
photolytic release of Cu from Cu penicillamine complex $[Cu(II)_6Cu(I)_8(D\text{-penicillamine})_{12}\text{-}Cl]^{5-}$, 219
Photochemistry
photochemical reduction of NADP to NADPH and hydrogenation of 2-butanone using 2,2′-bipyridinium salts as electron carriers, 55
Photosynthesis
on chemical mechanism of O_2-evolution in photosystem II, 73
Platinum complexes
crystal structures of four models for binding to DNA of cisplatinum derivatives containing bidentate tertiary diamine, 125

electronic structure of Pt(II) antitumor complexes and their interactions with nucleic acid bases, 151
reactions of [PtCl(dien)]Cl with glutathione, oxidized glutathione and *S*-methyl glutathione; formation of S-bridged dinuclear unit, 201
studies on reactions of $PtCl_2$en, *cis*-$Pt(NH_3)_2Cl_2$ and their aqua species with adenosine, deoxyadenosine and adenine using ion-pair HPLC, 91
synthesis and structure of tetra-5,6-dihydropyrimidino[5,4-*c*]carbazole dichloride hexachloroplatinate(IV) tetrahydrate, 189

Polydentate ligand complexes
Cu anti-inflammatory drugs in rheumatoid arthritis; computer aided drug design, 215

Porphyrin complexes
intermediate spin protoporphyrin(IX) Fe(III) complexes, 61
model complex for active site of cytochrome P-450, 5
photochemical reduction of NADP to NADPH and hydrogenation of 2-butanone using 2,2′-bipyridinium salts as electron carriers, 55

Protein complexes
^{43}Ca NMR of Ca^{2+}–calmodulin solutions; effects of trifluoroperazine and peptides, 257
surface area studies of Zn sulphide and its reaction with Cu complexes and Cu containing proteins, 265

Purine base complexes
monotheophylline and monotheophyllinato complexes of Pd(II) and their interactions with nucleosides, 101

Quinone complexes
high-spin Fe(II) complexes of *ortho*-functionalized paraquinones as models for quinone binding sites in reaction centres of photosynthetic bacteria, 37

Radiochemistry
radiochemical and electrochemical studies of interaction of Zn^{2+} (^{65}Zn) with radiosensitizer misonidazole, 43

Rheumatoid arthritis
Cu anti-inflammatory drugs in rheumatoid arthritis; computer aided drug design, 215

Rhodium complexes
dioarbonylrhodium(I) complexes of 8-azaadenine bases with N1 or N3 as metal binding sites, 223
synthesis and structure of complex tetra-μ-prolinatodirhodium(II), 107

Thiolate complexes
antitumor activity of some organometallic Bi(III) thiolates, 49

Tin complexes
antitumor activity of organotin compounds; reaction, synthesis and structure of Et_2SnCl_2-(phen) with 5-fluorouracil, 67
monomeric, air-stable metallocenes of main-group elements as antitumor agents, 75

Toxic metal complexes
role of rate determining steps in decorporation of toxic metal ions, 159

Transamination
role of delocalized α,α'-carbanion in vitamin B_6 and Al(III) catalyzed transamination of α-amino and α-keto acids, 181

Vanadium complexes
antitumor and toxicologic properties of organometallic anticancer agent vanadocene dichloride, 117

Vanadium compounds
ESR spectra of vanadyl ion detected in branchial basket of ascidian, *Ascidia ahodori*, 177

Zinc complexes
binding of metal ions by enalapril maleate and lisinopril, 81
metal binding in metallothioneins; competition for Cd and Zn between Chelex-100 and metal binding sites in metallothionein, 111
radiochemical and electrochemical studies of interaction of Zn^{2+} (^{65}Zn) with radiosensitizer misonidazole, 43
surface area studies of Zn sulphide and its reactions with Cu complexes and Cu containing proteins, 265
